

InSight™

50x MICROSCOPE LENS

The InSight™ 50x Microscope Lens is a magnification device which can be mounted onto any Smartphone to enhance the built-in camera, to capture high quality microscopic images and videos.

The Microscope Lens requires no batteries and displays a full screen image drawing light from its surroundings.

The compact and innovative design, as well as its easy accessibility and connectivity options make it an ideal tool for:

- Dermatology Examination
- Ectoparasite Identification
- Teaching Aid
- Scientific and Laboratory Research Tool
- Textile Examination
- Industrial Inspection
- Computer Parts Inspection
- Capture and Share Microscopic Images

Specification
