

Clinispin CT20 Centrifuge

Available for hire or purchase for your clinical trial.

Overview

The Clinispin CT20 has been designed to be capable of running up to 15ml tubes to a maximum speed of 6,500rpm. This corresponds to an RCF of 4,000 and its variable speed allows for a variety of applications to be performed. It is the smallest centrifuge in its class. The 21 x 24cm footprint makes it ideal for almost any laboratory and it can easily be transported from lab to lab.

It is also designed for quick production of PPP (platelet poor plasma) and PRP (platelet rich plasma) as well as other applications in the clinical or research laboratory.
