Customer Testimonial

Clinic - Nyaya Health, Achham, Nepal

“Our patient is a 63 year old widow who lives in the hills approximately 10 miles away. Due to the terrain her walk to the clinic was four hours one way. The woman's husband had died 13 years ago due to an unknown disease and she had come complaining of cough, shortness of breath and swelling on her face. Her husband was a migrant laborer in India so our doctor recommended a series of tests including a complete blood count, urea creatinine test, a random blood sugar test, and VCT for HIV. Without the QBC the CBC test would have taken our lab technician (Mr. Santosh Shrestha) over 1 hour. Having the QBC complete the CBC test in 10 minutes or so is crucial to our ability to see between 50-100 patients everyday, many of whom need laboratory services. Our sincere thanks again to everyone who had made the gift of the QBC possible.”

Nyaya Health is a non-profit, non-governmental organization working to improve the health of the rural poor in Nepal. Learn about their initiatives at www.nyayahealth.org
