

► Drugs Of Abuse Test Panels

available for hire or purchase for your clinical trial.

Overview

The Triage® drugs of abuse panel is a small, handheld urine test that provides qualitative results for up to 9 commonly abused drugs in about 10 minutes. The range of panels provide an extensive range of testing.

Amphetamine (AMP), Methamphetamine (mAMP), Barbiturates (BAR), Benzodiazepines (BZO), Cannabinoids (THC), Cocaine (COC), Opiates (OPI), PCP (PCP), Tricyclic antidepressants (TCA), Methadone (MTD), Propoxyphene (PPX) and Acetaminophene.

Operating Features

- Excellent discrimination around assay cut offs
- Ensures accurate patient and proficiency results
- Provide superior specificity
- Minimise false negative results
- Template permits hard copy archiving of results
- Greater cost efficiency
- Accepted by COLA, JCAHO and CAP
- Positive specimens produce a clear visual result
- Negative specimens do not produce a visual result

Specification

- Tests a wide range of analytes -
